

Switch-Off Fortnight

Switch-Off Fortnight is when the Eco Committee spend two weeks patrolling the school areas at play and lunchtime, to raise awareness of energy consumption and waste. They check that lights, taps and other electrical equipment, which is not in use, has been turned off. Here is a report from our two Year 6 Eco Committee members:

"Switch-Off Fortnight started on Monday 20th November 2018 and ended on Friday 1st December. We had to check all of the classrooms and corridor areas to see if any electrical items had been left switched on. We worked in pairs and found out that the most common thing that was left switched on was the whiteboards in classrooms. We hope that we helped to save the school some money (and helped to protect the environment by not wasting energy.)"
